Behavioural Awards Program

UTAS · rxp SERVICES
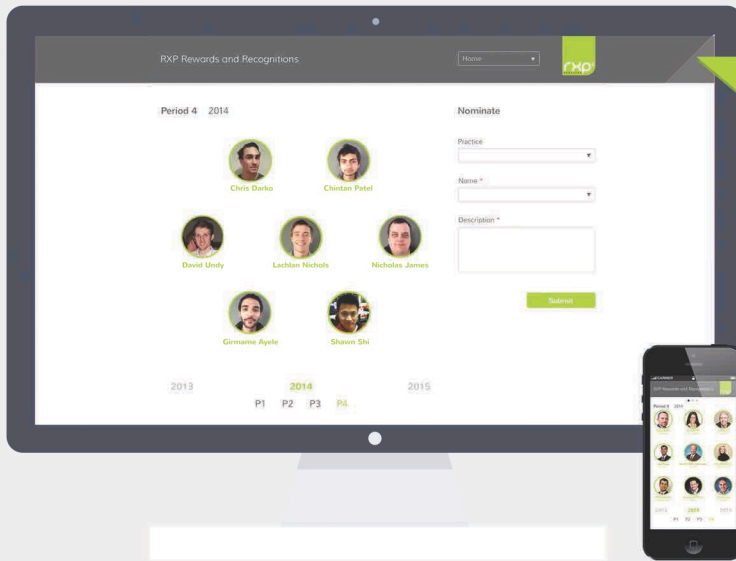

The Behavioural Awards Program was created to allow RXP Services to identify, recognise, and publicly acknowledge the outstanding contributions of high performing employees. This program allows staff from RXP Services to nominate one another for exceptional performance, whilst also allowing management staff to evaluate nominations, publish winners and generate reports of various statistics.

Staff View

Staff members simply need to enter the nominated employees name, and write a description on why they deserve the nomination. Employees can also view previous winners from all practices and past periods.

The Behavioural Awards Program can be accessed on a mobile device. Staff members will be able to submit their nominations, view past winners and evaluate nominations on the go!
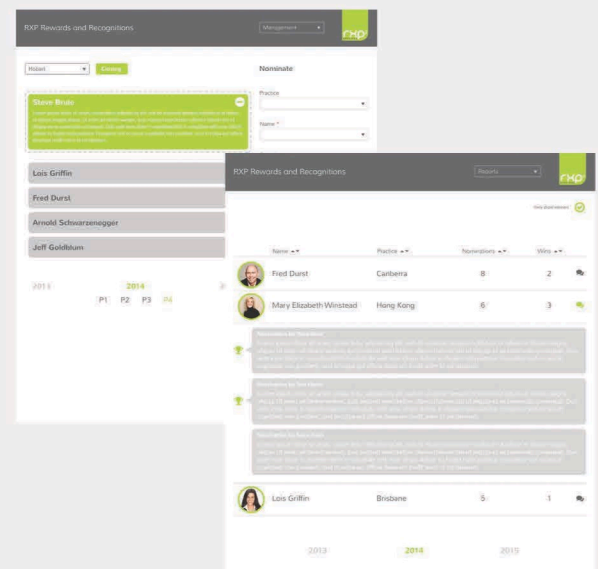

Management View

Nomination Evaluation

The system allows Committee Members to evaluate and select winning nominations. They can select a winner from each RXP Services practice, and publish the results to Yammer.

Reports

Committee Members have the ability to track statistics such as: how many times an employee has won, how many times an employee have been nominated and the reasons of the nominatations.

Project Team
